# HITMASTER GROBAT™

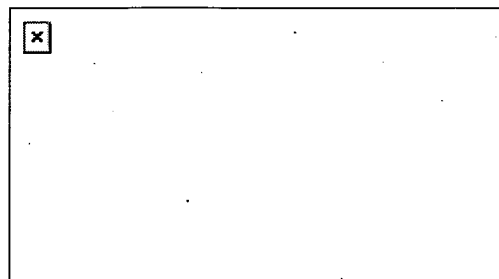

## "THE BAT THAT GROWS WITH YOU!"

For use with Wiffleballs™ ONLY!

Developed and Tested by Chris Richard, Major League Baseball Player

Introducing  
**NEW GROBAT**  
"The Bat that Grows"

Albert Belle congratulates

❶ The GROBAT is a small-diameter bat featuring a movable Sweet pad that tells the batter that he (or she) is using the correct area on sweetspot. Since this area is smaller than that of a regular bat, hand coordination and confidence of the batter improves dramatically!

❷ Unlike other hitting "sticks" however, the GROBAT is unique because of its variable length AND weight, and thus can be used by multiple persons of different age and size, or by one person who is growing quickly! It is critically important that during extended batting practice, the hitter use his GAME BAT to maintain timing and mechanics. Use of any training device that does NOT mimic the dynamics of the game bat is detrimental to developing consistent swing mechanics. Using lighter or heavier bats in extended practice can defeat their intent — better hitting!

❸ Unlike other bats, GROBAT can be easily modified in both length and weight.

***Chris on his home run!***

and comes equipped with a movable choke/collar and a set of weights. The GROBAT can mimic any bat, from 28"/19oz. to 34"/33oz. in between!

Ⓜ The GROBAT collar can also be used on the handle of a regular bat (see photo above), so that when you purchase your next bat, you can get a 1" or 2" larger bat which will "grow" with your son (or daughter), saving money and maintaining familiarity.

Ⓜ The GROBAT is available in 30", 32", 33" and 34" standard lengths and, un-weighted, are 19, 20, 21, and 22oz. respectively. The coin-removable threaded end plug allows insertion of any combination of 2, 3, or 4-ounce weights (see photo).

Ⓜ These features allow the GROBAT to be used as a light weight "stick" to develop quick speed through the zone, or it can be over-loaded to develop and stretch the large muscle groups. This type of practice should be between 20 and 30 percent of your practice regimen, with the remainder using your GROBAT with the same weight and length as your game bat. *This practice technique optimizes the most important aspects of your hitting game, batspeed, power, and hand-eye coordination!*

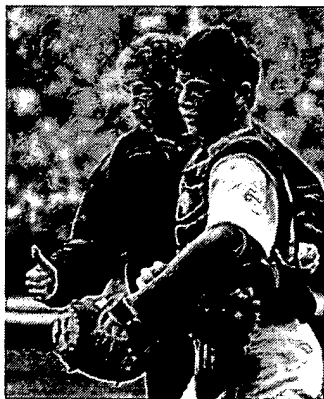

Ⓜ Proper selection of your GROBAT length is important so it can be used for the maximum number of years by your oldest child. It can always be downsized for smaller players coming up.

| If you need a... | ...then order a...                                 | With a Weight-Pac & Choke Collar |
|------------------|--|----------------------------------|
| 27" thru 29" bat | GB30   | 2 to 9 oz. insertable            |
| 30" thru 31" bat | GB32   | 2 to 9 oz. insertable            |
| 32" thru 34" bat | GB33 or GB34<br>(size depends on your growth rate) | Weight-Pac included              |

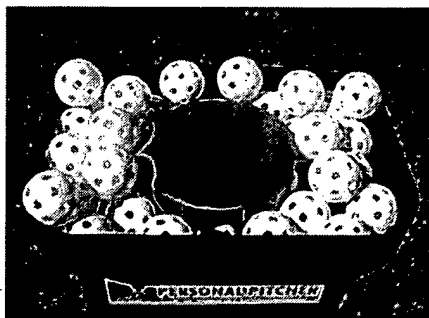

***The GROBAT is the most innovative and effective hitting tool on the market, and at only \$49 (\$59 with the weight-pac), the least expensive. Personal Pitcher customers save an additional \$10!***

## The GroBat

The GROBAT is a small-diameter bat featuring a movable Sweetspot Simulator pad that tells the batter that he (or she) is using the correct area on the bat, the sweetspot. Since this area is smaller than that of a regular bat, hand-eye coordination and confidence of the batter improves dramatically!

Unlike other hitting "sticks" however, the GROBAT is unique because of its variable length AND weight, and thus can be used by multiple persons of different age and size, or by one person who is growing quickly! It is critically important that during extended batting practice, the hitter use his GAME BAT to maintain proper timing and mechanics. Use of any training device that does NOT mimic the dynamics of the game bat is detrimental to developing consistent swing mechanics. Using lighter or heavier bats in extended practice can defeat their intended purpose — better hitting!

Unlike other bats, GROBAT can be easily modified in both length AND weight, and comes equipped with a movable choke/collar and a set of weights from 2 to 9 ounces. The GROBAT can mimic any bat, from 28"/19oz. to 34"/33oz. , or anything in between!

The GROBAT collar can also be used on the handle of a regular bat (see photo above), so that when you purchase your next bat, you can get a 1" or 2" larger bat which will "grow" with your son (or daughter), saving money and maintaining familiarity.

The GROBAT is available in 30", 32", 33" and 34" standard lengths and, un-weighted, are 19, 20, 21, and 22oz. respectively. The coin-removable threaded end plug allows insertion of any combination of 2, 3, or 4-ounce weights (see photo).

These features allow the GROBAT to be used as a light weight "stick" to develop quick speed through the zone, or it can be over-loaded to develop and stretch the large muscle groups. This type of practice should be between 20 and 30 percent of your practice regimen, with the remainder using your GROBAT with the same weight and length as your game bat. This practice technique optimizes the most important aspects of your hitting game, batspeed, power, and hand-eye coordination!

Proper selection of your GROBAT length is important so it can be used for the maximum number of years by your oldest child. It can always be downsized for smaller players coming up.

If you need a...27" thru 29" bat ...then order a... 30" GroBat JR (Choke Collar included)

If you need a...30" thru 31" bat ...then order a... 32" With a Weight-Pac & Choke Collar

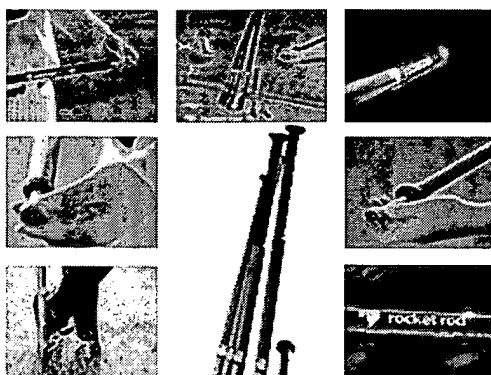

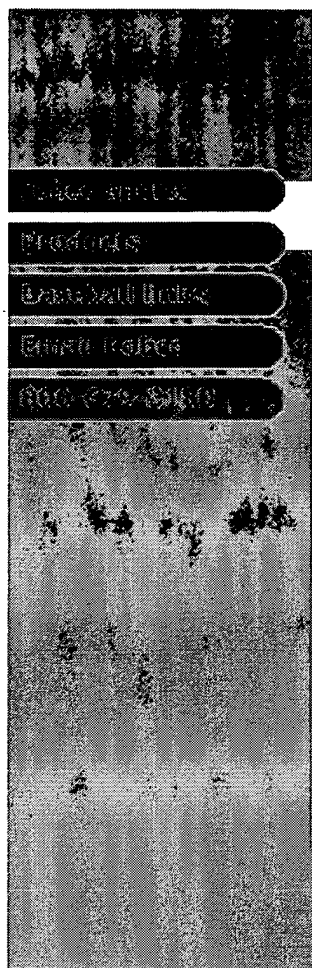

If you need a...32" thru 34" bat ...then order a... 33" or 34" With a Weight-Pac & Choke Collar

**\*\*Weight-Pac & Choke Collar included with all bats except GroBat JR (Choke Collar only).**

This product is fantastic with the XLR8 Practice Balls.

than the bat you use in the game it will develop quick wrists and bat speed, it's like putting a swing weight or doughnut on your bat but the Rocket Rod already has the weight built in.

The new 2004 Rocket Rod has Swing Weight Technology that allows you to change the swing weight of the bat simply by inserting one of the three weights available (weights sold separately) into the handle and / or barrel of the bat giving you 12 different handle to barrel weight ratio combinations, no other bat offers such a unique feature.

Every good batter steps into the batters box with the confidence that they can hit any pitch they see and the Rocket Rod will develop this confidence in a short amount of time once you start using it. So give the Rocket Rod a try and "Watch Your Average Soar".

## Rocket Rod

Are you ready for one of the most versatile and fun to use **Baseball / Softball Training Bats** available on the market today?

Well this is it, the **Rocket Rod** has the look and feel of a game use bat and will challenge any hitter's skills as well as develop them. Talk about eye-hand coordination! The **Rocket Rod** barrel is only 1-1/8 inch in diameter and when used with XLR8 Practice balls your concentration and eye-hand coordination is taken to another

level. There are three components to hitting and using the **Rocket Rod** with the XLR8 Practice **Baseball** satisfies all three components! Power (weighted RocketRod) Accuracy (Small Ball, Small Barrel) and Timing (XLR8 Practice Balls are the only product on the market that develops the most critical of the three components.. TIMING!) You can also use **baseball / softball** size plastic balls or tennis balls with the **Rocket Rod**.

Because the **Rocket Rod** is slightly heavier than the bat you use in the game it will develop quick wrists and bat speed, it's like putting a swing weight or doughnut on your bat but the **Rocket Rod** already has the weight built in.

The new 2002 **Rocket Rod** patented Swing Weight Technology allows you to change the swing weight of the bat simply by inserting one of the three weights available (weights sold separately) into the handle and / or barrel of the bat giving you 12 different handle to barrel weight ratio combinations, no other bat offers such a unique feature.

Every good batter steps into the batters box with the confidence that they can hit any pitch they see and the **Rocket Rod** will develop this confidence in a short amount of time. So give the **Rocket Rod** a try and "Watch Your Average Soar".

**Rocket Rod Training Bats** are made from zinc plated steel and coated with a tough powder coat finish. They are available in 4 different lengths.

(Not To Be Used In Batting Cages Or With Hardballs)

RR001 **\$39.95** Length/Weight: ☒ 28"/24oz ☐ **Order**

**Rocket Rod Jr.** **Rocket Rod Jr.** is designed and developed for the front hand or bottom

hand to the ball drill that is so important and used by **Baseball / Softball** Coaches and Hitting Instructors everywhere. The front hand on the bat needs to get to the ball on a consistent basis in order to make solid contact on every swing. When you use the **Rocket Rod Jr.** you hold the bat with the front hand only during your batting practice and it will develop this important skill and create good batting habits from muscle memory and repetition.

**Rocket Rod Jr.** is smaller and lighter than a conventional bat (20 inches, 18 ounces) so there will be less fatigue for a better work out. **Rocket Rod Jr.** also has the same patented Swing Weight Technology that allows you to change the swing weight of the bat (weights sold separately).

(Not To Be Used In Batting Cages Or With Hardballs)

RR002 \$34.95

**Rocket Rod Weights** The patented Swing Weight Technology of the **ROCKET ROD** allows you to adjust the swing weight of the bat you are using, simply by inserting one of the three threaded weights available into the handle or barrel of the bat, allowing for 12 different handle to barrel weight ratio combinations.

Three weights in the set: (1) 2oz., (1) 3oz., and (1) 4oz. weight. This allows you to select a **ROCKET ROD** length that suits you best and set it up to the proper weight for your needs. And for you coaches you can change the swing weight of the bat to best suit the different players on your team.
